Relevant Experience

Front-End Developer @ Welz U.S.

Nov 2022 - PRESENT

- Reduced user dropoff rate by 25% for the Welz platform by shortening the appointment booking journey.
- Improved appointment scheduling for the organization by enforcing uniformity across time zones.
- Increased the customer base for Welz by providing more payment options and more insurance companies.

Software Engineer @ Hair Flare kenya

July 2022 - Nov 2022

- Broadened the outreach of H.F.K. by providing an elegant design for their e-commerce platform
- Reduced the user journey by 25% by providing more filter options for their product catalog instead of endless scrolling.
- Reduced load times by almost 50% by implementing a graphql API reducing overfetching and using caching.

Engineer @Reggy Cudas

Nov 2021 - June 2022

- Improved the company's versatility by learning more technologies and frameworks.
- Reduced the server costs and load times by 50% on front end interfaces by optimizing build sizes.
